Vertical Machining Center

General

Wide range production with verify level performance provide multiple choice for suitable model of application. Stand in customer's consideration, Akira Seiki machine performance value can stand the test of time.

Model

JR/SR-Performa Junior

JR / SR2 / SR3
JRXP / SR2XP / SR3XP
SR32XP / SR42XP / SR52XP / SR45XP /
SR55XP

Model

V-Performa Classic Extra Performance

V2 / V2.5 / V3 / V4 / V5 / V4.5 / V5.5 / V6 / V8 / V10
V2XP / V2.5XP / V3XP / V4XP / V5XP
V4.5XP / V5.5XP / V6XP / V8XP / V10XP

Model

SV-Super Vertical

SV550 / SV760 / SV815 / SV1050
SV1300 / SV1150 / SV1350 / SV1630
SV2060 / SV2600

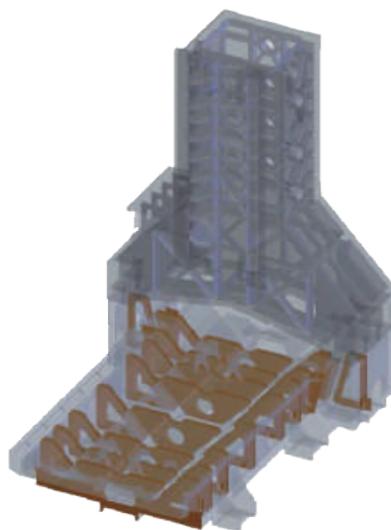

Model

HV-A-Superior Speed Heavy Duty

HV4.5A / HV5.5A / HV6A / HV8A
HV10A

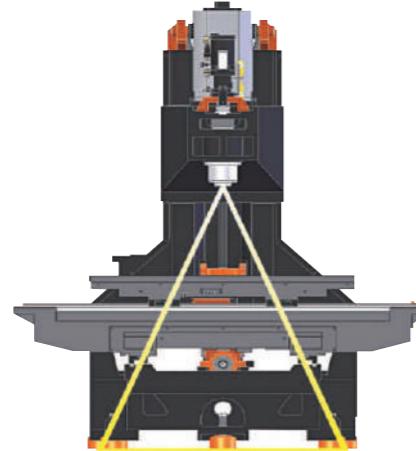

Rigid Physical Foundation

Akira Seiki VMC casting are steady to perform outstanding dynamic accuracy and vibration absorption while rapid cutting.

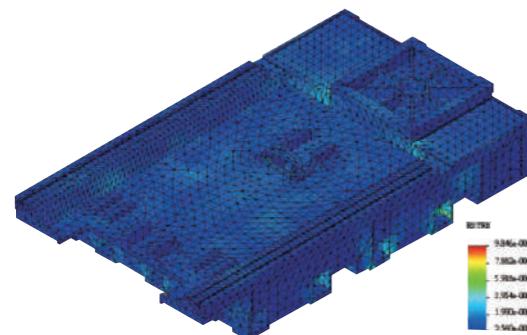

Reinforced Frame Construction

Internal ribs of each keycasting elements are enforced for deformation-resistant and anti-damping vibration.

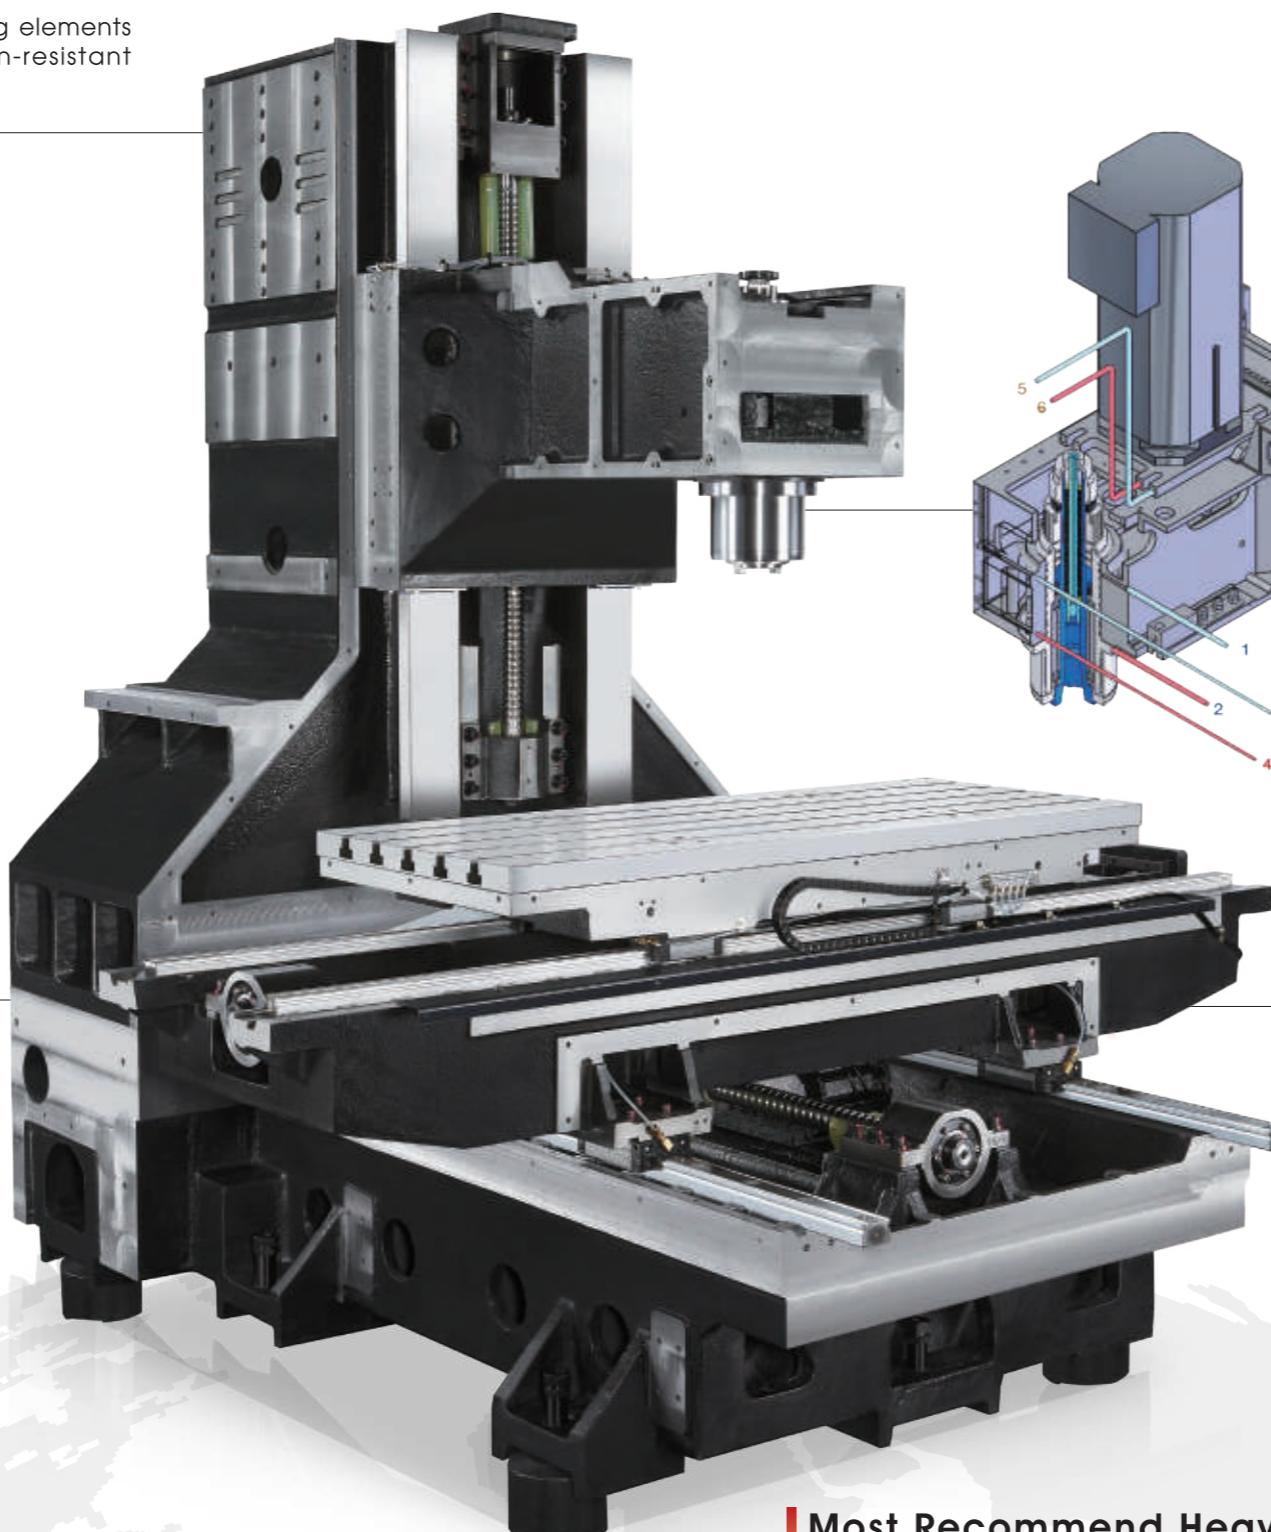

Golden Triangular Frame

In optimum span of bed base and guide ways supports the superior acceleration and deceleration movement.

Scientific Technology Support

Digital FEA (Finite Element Analysis) scientifically demonstrates rigid structure and approves excellent dynamic accuracy and vibration absorb by advanced digital assay tool.

Meehanite High Quality Casting Iron

Assures permanent rigidity and accuracy for each Akira Seiki machine casting frame by the authorized Meehanite foundries.

A Rigid Column

Optimum span steady base with A-type large box way column design, Z-axis employs robust slide way and spindle head cartridge for powerful pocketing and fast milling. (For model with Y-axis travel upper 540mm)

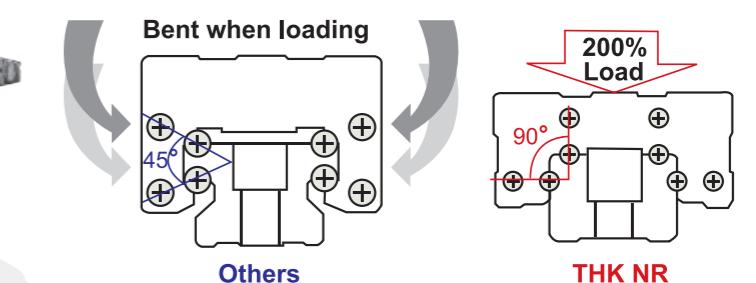

Head Stock Thermal Control

Technology of coolant circulated inside the casting headstock to maintain the constant temperature to prevent deformation which generated by spindle during cutting.

Double-anchored Ballscrew

Enhance high speed cutting rigidity and 100% laser track and ball bar collaboration test to ensure geometry accuracy.

(except JR/SR series)
(V2/V2.5/SV550/SV760 Z axis employ Tsubaki linear guide way.)

Most Recommend Heavy Load Linear Guide Way (THK NR Type)

Least friction coefficient and preloading for clearance-free between moving surface, precise ball linear guide ways are most compatible for fast movement and high positioning and repeatability accuracy.

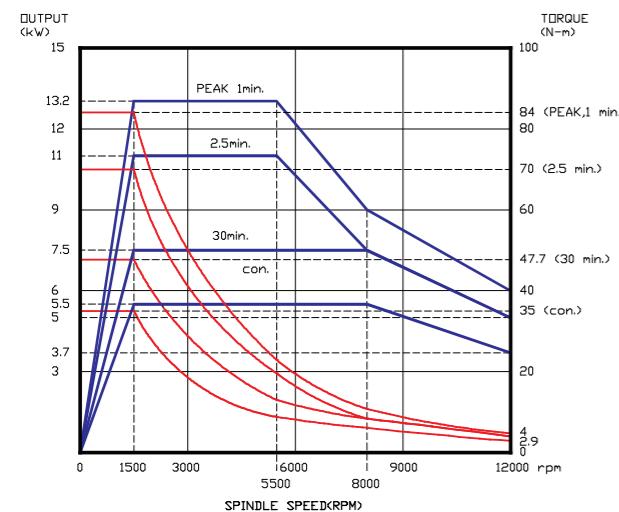

Spindle Feature

High precision NSK 4+2 bearings support the cutting reaction and keep longer running without the damage of burning with using high speed and high rigidity spindle.

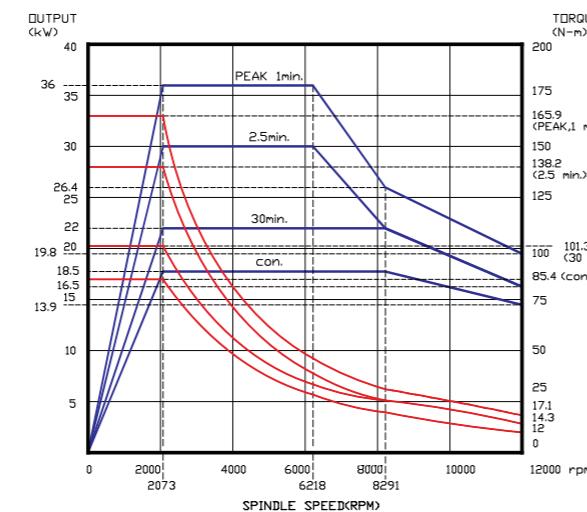

Inherit high speed machining conception, Akira Seiki V/SV series is capable of high speed heavy cutting by employing high output spindle motor with max 42HP/117.3 N·m 12k/15k rpm spindle which can reduce machining time dramatically.

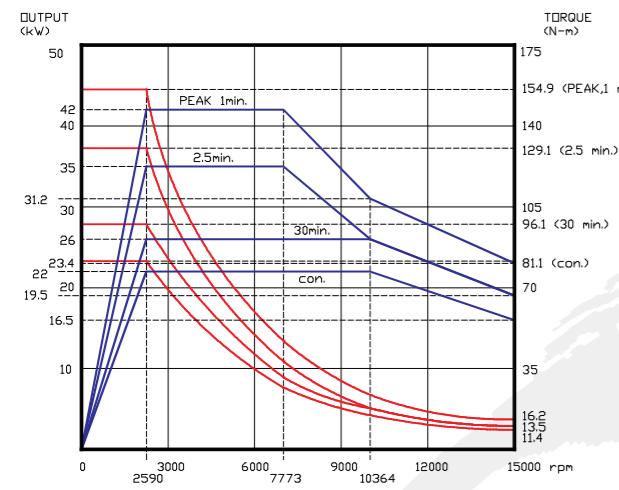

JR/SR series

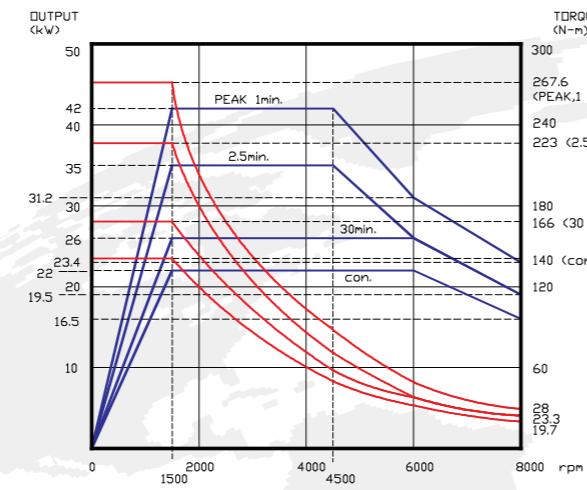

V series except V2 / V2.5

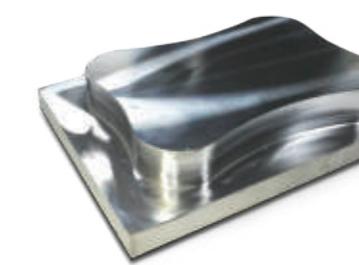

SV series except SV550 / SV760

HV-A series

Cutting Application

Soft Material

- Material : A6061 Aluminum
- Face Mill Cutter: 50 mm
- Spindle Speed: 10,500 rpm
- Cutting Feed: 9,525 mm/min
- Width : 28.4 mm
- Depth: 5.3 mm

Removal Rate: 1435 cc/min

- End Mill Cutter: 19.5 mm
- Spindle Speed: 11,500 rpm
- Cutting Feed: 8,255 mm/min
- Width: 12 mm
- Depth: 12.5 mm

Removal Rate: 1238 cc/min

Hard Material

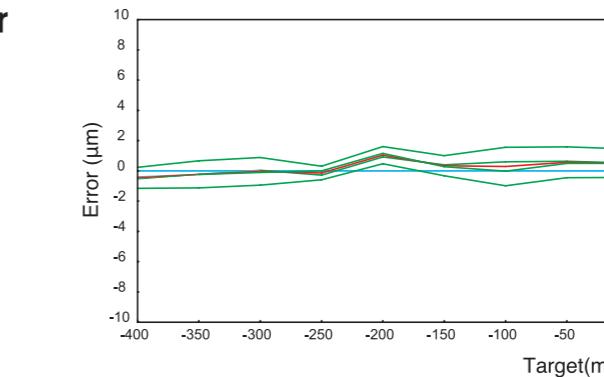

- Material: S45C Steel (JIS), CK45(DIN), 1045(ASTM)
- Face Mill Cutter: 50 mm
- Spindle Speed: 4,000 rpm
- Cutting Feed: 12,827 mm/min
- Width: 28 mm
- Depth: 1.27mm

Removal Rate: 456 cc/min

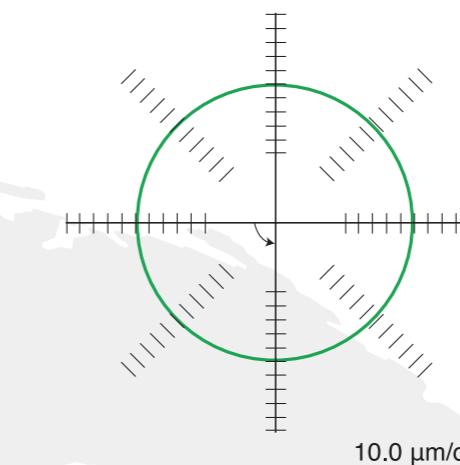

- End Mill Cutter: 50 mm
- Spindle Speed: 4,000 rpm
- Cutting Feed: 2,032 mm/min
- Width : 4.1 mm
- Depth : 17 mm

Removal Rate: 142 cc/min

Laser

Ball Bar

*Cutting test results indicated in this catalog are provided as examples.

The measured results may not be obtained, due to differences in cutting conditions and environmental conditions.

AKIRA Mi845 Control High Achievement And Easy Operation For Machining Efficiency

- Powerful **64bit CPU** incorporate the fastest-ever computation processions and program scanning.
- Full **look ahead up to 500 blocks** and **G05P10000 High Speed and High Accuracy Control** allow contouring rapid and smoother motion.
- 5120M (2MB) initial program memory is available as the largest industrial NC program stored capability (option)
- Full **Graphic Function** including simulate run, tool path check and graphic scaling the same coordinate.
- 3 M-codes In the same line achieve **least code-code pause** for operation efficiency.
- T-code and M-code In the same line Is readable such as **M6TX, TXM6 or TX M6**.
- Simple to correct 3 level alarm condition within same page, no inconvenience of forth and back viewing.
- **Program Reserver** available to adapt flash memory card & Ethernet connection.
- High compatibility to Fanuc control programming.
- **One-Button Features** ease the often used functions instead of multi-steps procedure. Only by one-button command to complete
